

## What is Site Licensing?

Site licensing gives you and your staff on-demand access to all of our online educational programs 24 hours a day, 7 days a week for an entire year!

Through our educational site licensing program, your facility receives access to any of our educational programs through your internet connection and a special login code.

## Why Purchase a Site Licensing Program?

This individualized training program presents a significant savings to your hospital or organization. Purchase access for as few as 5 users to an unlimited number of users. Each user has unlimited access to all of our educational programs (except CPUI Certification).

Courses are completed online from any computer, anywhere, using a specific access code. Testing is completed online; after successful completion of a program, certificates are printed immediately showing completion of the educational program.

## Site Licensing

Excellence in Vascular Access Education

Bringing in a professional to train your PICC staff can be an expensive and complicated proposition. Coordinating available space, arranging schedules so pertinent clinicians can be available for one or two day training sessions and the cost in man hours all add up to a higher cost for training than anticipated.

Our educational site license allows you to tailor your training expenses to meet your exact needs. Clinicians can learn individually, coordinate their personal schedules or even take the course or courses from their own homes. Once the didactic portion is complete, clinicians simply work with a preceptor to complete their practicum.

For example, if your facility purchases the '5 User' program, any 5 people you select will have unlimited access to ALL of our educational programs (except CPUI Certification) for an entire year.

Our goal is to provide excellent education to you and your facility in a format that works for you!

**Courses available through the site licensing agreement include:**

- Basic PICC Qualification Training
- Care and Maintenance of PICC Lines
- Inserting PICCs with Ultrasound
- Complication Management for PICC and CVC
- Advanced Ultrasound Assessment for PICC Placement
- Infection Prevention Series (3)
- Central Line Associated Bloodstream Infections
- Central Line Bundle Program
- Central Line Insertion Procedures
- Ultrasound Short-Program Series
- Ultrasound Technology
- Step by Step Ultrasound Guided Insertion Procedure
- Tips and Tricks for Ultrasound Guided Insertions
